

Spam-free email ?

Partnering with Google Apps™, I can offer clients virtually spam-free email hosting services, with great features such as massive 25 gigabyte mailboxes, POP + IMAP access, email forwarding, mobile email access, online calendar sharing, document sharing, and instant messaging with Google Talk™.

Google Apps™ brings together essential services to help your business, school, group or family communicate and collaborate more effectively - all using your own domain name! These services are powerful, easy to set up, and require little maintenance. Everything is unified by the Start Page, a central place to preview inboxes and calendars, access essential content, and search the web.

Google Apps™ Gmail-based email service uses powerful technology provide excellent protection from viruses, spam, and alert you when you receive phishing messages. These features help provide a safer email experience.

Access your email via mobile phone ! Use the Gmail mobile application onto your BlackBerry® smartphone for fast access to your mail account when you're on-the-go. If you don't have a BlackBerry® smartphone, you can access a streamlined version of the Gmail web interface from your phone, built especially for mobile devices.

Google Apps features:

Gmail

Email with up to 25 GB of storage per custom email address, mail search tools and integrated chat. Google Docs

Create, share and collaborate on documents in real-time. Google Calendar

Coordinate meetings and company events with sharable calendars. Google Sites

One-stop sharing for team information. Google Talk

Free text and voice calling around the world. Security and compliance

Set email policies and recover deleted messages.

Remember: These are not Gmail.com - based email accounts (for example, myname@gmail.com) - Google Apps lets you and your business harness the power of Gmail, with your OWN domain name !
