

Computer Re-Installation

Full computer re-installations in Los Cabos, Baja California Sur Mexico, including data backup and transfer. PC computers, Macintosh, and Linux platforms supported, using modified installation routines that instantly give you a wide array of useful software (WinZip, DVD Decrypter, MS Office, O&O Defrag, Norton Security Suite, and many others - proper licensing required), plus all the current updates, hotfixes, and tweaks to ensure your new computer installation is error free, secure, and optimized to run as fast as possible on your computer.

CURRENT SPECIAL: \$150 USD for a fresh system reinstallation, including data backup, transfer, and setup to the new installation. Current versions of Microsoft Vista™, Microsoft Windows XP, Microsoft Windows 2000, Microsoft Windows 98, current versions of Mac Leopard OS, and any linux distro. Valid license required for all Microsoft and Macintosh installations.

24 Hour turnaround !!

Home and business computers are frequently targeted by hackers as well as interrupted by pop-ups and spyware. This can lead to a serious deterioration in a machine's performance and available bandwidth, not to mention data theft and loss. Sometimes spyware and viruses can be removed from a computer using software removal methods, but there are often cases where this is not possible, and a complete system reinstall is necessary.
