

Protect that precious data !

I can't stress enough the importance of data security and redundancy. This is an area that many people end up reacting to a catastrophic data loss, rather than implementing steps proactively to ensure data integrity in the event of a computer crash, harddrive failure, power surge, disaster, intrusion, or viral infection.

Whether your company trades in intellectual property, sensitive customer data or financial information, data is your business. Making that data available to your clients, co-workers, and partners while keeping it safe from misuse, theft and loss is one of the most urgent and important issues facing businesses today.

How can I help ? By offering both onsite and remote backup services in either daily, weekly, or monthly schedules. All data is encrypted using 128bit industry-standard encryption and is kept offsite for safe and quick retrieval in the event of a data loss. Very affordable, serving the Los Cabos area.

Don't risk it all: regular backups can securely safeguard your personal and business information, and you will be surprised how simple and cost effective it is.

Don't wait until it's too late !

Use the contact form above-right to find out more about Data Backup Services in Los Cabos, Baja California Sur, Mexico, and how they can save you and your business.
