

Surveillance solutions

Whether you have a small-to-medium business or a large corporation, your company's information and competitiveness is at risk - and you may not even know it.

Implementing a surveillance solution will increase employee productivity, provide a safeguard in the event of inappropriate employee behavior, and protect your company from electronic information leakage. Surveillance services:

- PC/Web based perimeter security cameras, also webcams (indoor / outdoor, tilt/panning, remotely control from anywhere in world)
- Surveillance software services
- Web content filtering software
- Employee surveillance services/strategies
- Spousal/children home orientated surveillance
- Remote / offsite surveillance

Protect yourself, your family, and your business.
